TECHNOLOGY: Over 100 years of sports eyewear innovation is seamlessly integrated into every pair of Bollé sunglasses. Accept no substitutes for the fit, form and function of authentic performance technology.

ABSORBER HINGES

Ergonomically designed hinges provide appropriate tension on the temples for a comfortable, snug fit. Available on the Canebrake.

HYDRALON™

Bollé's proprietary, fortified nylon frame material is comfortably lightweight and virtually indestructible.

THERMOGRIP®

Super strength rubber temples and nose pads deliver firm, comfortable adhesion, especially when you sweat.

MICROFUSION™

A patented metal frame manufacturing process. Molten metal alloys are injected into specially designed molds for precision frame styling and design. Available on the TNT and Meanstreak.

SHOCK ABSORBER TEMPLE TIPS

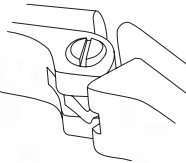

These Thermogrip® temple tips have a portioned metal core that allows more comfort and flexibility, while staying securely on your face. Available on TNT and Meanstreak frames.

DUAL COMPOSITION FRAMES

Monel, a light, corrosion-resistant metal alloy, is fused with nylon to create a durable metal frame with the comfort of a nylon frame. Available on Bollé Metals.

SPRING HINGES

Engineered to provide just the right amount of tension on the temples so frames fit comfortably on your face. Available on most Bollé Metals.

AIR MANAGEMENT

Unique venting designs integrated into many of our nylon frames create a potent anti-fog system.

RX ABILITY

Most Bollé frames have been specifically engineered to accommodate Rx prescriptions.

ADJUSTABLE NOSE PADS

Allows you to tailor the position of each nose pad to fit the unique angles of your nose and keep the frame securely on your head. Available on Bollé Metals.

WIRE-CORE TEMPLE TIPS

Adjustable wire core temple tips increase comfort by creating a unique fit for each wearer. Available in Parole, Vigilante and some Metals.

POLARIZATION

Embedded in the lens, this optically precise filter enhances visual acuity by eliminating extreme glare and reflections.

P3 TECHNOLOGY

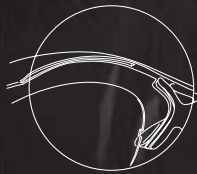

Performance, Polycarbonate, Polarized lenses represent the ultimate combination of science and performance.

UVA/UVB PROTECTION

Bollé exceeds the industry standard with 100% UVA/UVB protection, up to 400 nanometers.

OPTICS CONTROL SYSTEM™

Unique interchangeable lens system lets you select the right lens for any light condition. Available in most Action Sport frames.

SPORT OPTICAL SYSTEM [SOS]

Bollé's patented Rx adapter design allows easy attachment of prescription lenses to our Vigilante and Parole interchangeable lens frames.

CARBO GLAS® COATING

Industrial strength protective lens coating applied to both sides of the lens provides superior scratch-resistance.

POLYCARBONATE [PC] LENSES

Ultra-lightweight and virtually shatterproof, Bollé's premium grade plastic resin lens is 20 times more impact resistant than glass and one-third the weight.

ANTI-REFLECTIVE [AR] COATING

Scientifically engineered lens coating applied to the backside of Bollé lenses eliminates annoying backside glare and ensures crystal clear optics.

ANSI STANDARDS

All Bollé lenses exceed ANSI [American National Standards Institute] requirements for UV protection, impact resistance and optical clarity.

LENS COLORS

Bollé 100
Extremely dark amber lens. Perfect for climbing in high altitudes with extremely bright light conditions. ♦10%/0%

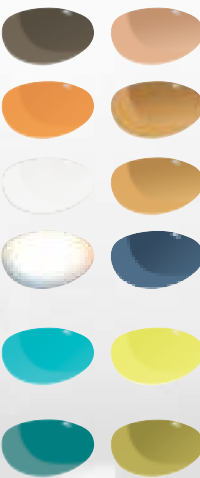

Citrus
Medium contrast orange lens. Ideal for low to medium light conditions. ♦32%/88%

Clear
Crystal clear lens. Ideal for night time activities, Like night skiing. ♦87%/85%

Clear MLR
Customized clear lens with a unique multi-layer red flash mirror to enhance visual acuity during low-light and no-light conditions. Ideal for night activities and "clubbing in the city". ♦75%/59%

CompetiVision®
THE tennis lens. High contrast teal hinted lens that mutes all colors except for optic yellow so ball stands out. Ideal for tennis and softball [optic yellow ball]. ♦33%/89%

CompetiVision® Gun
Bollé's authentic CompetiVision lens with a flash metallic silver mirror to cut the harsh glare on the court in bright light conditions. This lens slightly mutes all colors except for optic yellow so ball stands out and enhances visual acuity. Ideal for bright days on the tennis court. ♦23%/53%

EagleVision 2™
High contrast cinnamon lens. Ideal golf lens as it highlights the breaks in the green. Best for low light conditions on the golf course. ♦28%/53%

EagleVision 2™ Dark
Darker version of original high contrast cinnamon lens. Ideal for bright days on the golf course. ♦23%/89%

EagleVision 2™ Gold
High contrast cinnamon lens with gold mirror coating. Ideal for most low and bright light conditions on the golf course. ♦15%/36%

Inx™
Granite gray medium contrast lens with blue mirror. Ideal for high glare and outdoor sporting activities. ♦11%/25%

Lemon
High contrast yellow lens. Ideal for very low light conditions. ♦84%/84%

Midas™
Burnt gray medium contrast lens with gold mirror. Ideal for high glare light conditions and outdoor sporting activities. Also reduces eye fatigue by cutting down on infrared light transmission. ♦13%/31%

Mogul™
Customized Bollé's authentic Vermillon lens to enhance contrasts of white light wave lengths with a flash silver metallic mirror to reduce intense reflection of snow and surfaces. Ideal for snow/sport activities and looking "cool". ♦22%/61%

Polarized Cactus™
Medium contrast gray/green lens with gradient gold mirror and polarizing filter. Ideal for driving eliminating annoying road glare. ♦20%/87%

Polarized Cobaltz™
Medium contrast steel gray lens with platinum metallic blue mirror and polarizing filter. Ideal for high glare environments and bright light conditions, such as marine sports. ♦13%/62%

Polarized Inx™
Granite gray medium contrast lens with blue mirror and polarizing filter. Ideal for high glare and outdoor sporting activities. ♦14%/63%

Polarized Midas™
Burnt gray medium contrast lens with gold mirror and polarizing filter. Ideal for high glare light conditions and outdoor sporting activities. Also reduces eye fatigue by cutting down on infrared light transmission. ♦14%/52%

Polarized Sandstone®
High contrast amber lens with polarizing filter. Ideal for everyday high glare conditions. ♦19%/80%

Polarized Sandstone® Gold
High contrast amber lens with gold mirror and polarizing filter. Ideal for high glare, bright light conditions. Also reduces eye fatigue by cutting down on infrared light transmission. ♦14%/48%

Polarized Sandstone® Gun
High contrast amber lens with metallic silver mirror and polarizing filter. Ideal for everyday high glare conditions. ♦15%/72%

Polarized TNS
Neutral density gray lens with polarizing filter. Provides true color definition while fighting harsh glare. Ideal for everyday all-purpose use. ♦13%/87%

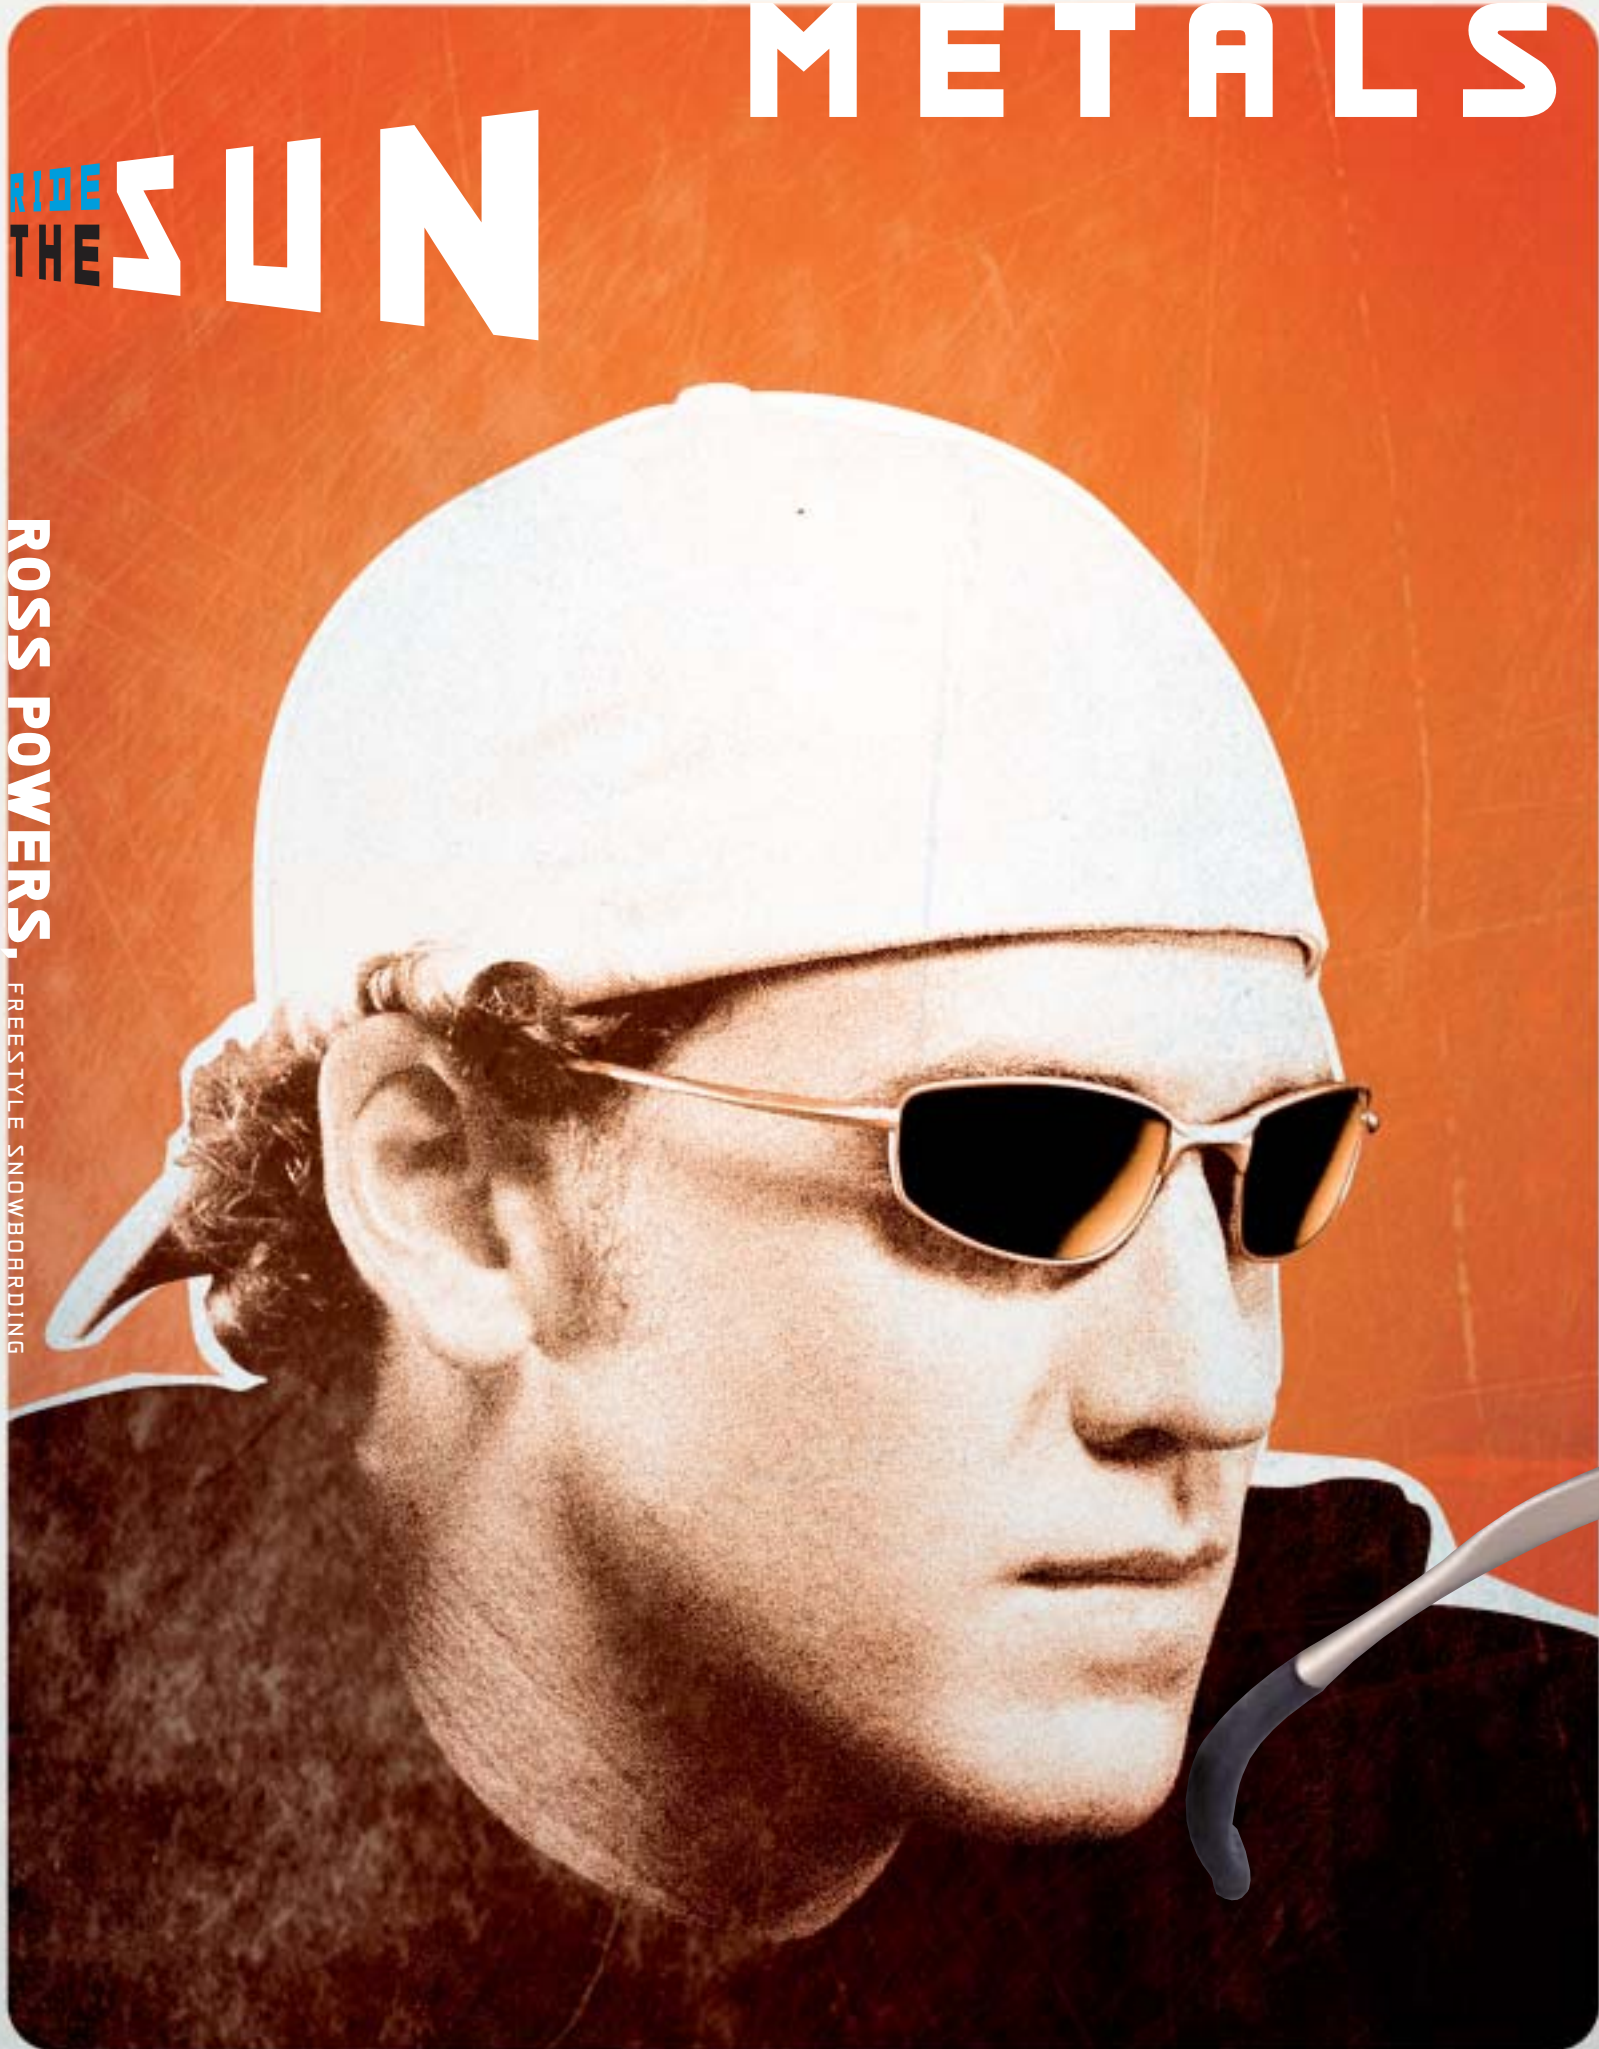

Polarized TNS Gun
Neutral density gray lens with metallic silver mirror and polarizing filter. Provides true color definition while fighting harsh glare. Ideal for everyday, all-purpose wear. ♦9%/51%

TLB [True Light Brown] Gold
Neutral density light brown lens with metallic gold mirror. Provides true color definition. Ideal for high altitude, high glare conditions. ♦9%/51%

TNS [True Neutral Smoke]
Neutral density gray lens provides true color definition. Ideal for all-purpose use. ♦12%/36%

TNS Gun
Neutral density gray lens with metallic silver mirror. Provides true color definition. Ideal for everyday, all-purpose wear. ♦13%/34%

Vermillon
High contrast rose lens. Ideal for low to medium light conditions. Perfect for snow sports activities and as all-purpose eyewear. ♦40%/84%

LOVE THE SUN

ACTION SPORT

Competivision® lenses act like filters, carefully muting all colors in the spectrum except optic yellow. The result is remarkable: a tennis ball that literally pops out of the background. That's why the US Professional Tennis Association made Competivision their official eyewear. Most frame styles in this collection feature the Optic Control System™ for interchangeable protection on and off the court. Action Sport Tennis. Enjoy the advantage.

SERGIO GARCIA, GOLF

PLAY THE SUN

Bollé's Action Sport Golf collection, the preferred eyewear for golfing pros. EagleVision 2™ lenses enhance contrast at the green part of the color spectrum, helping you see breaks in the green and reducing annoying glare. Action Sport Golf. When you see like a pro, you can putt for the dough.
