

LIFE IS NOT ABOUT JUST EXISTING.

It's about moving. It's about performing. It's about riding the dusty, criss-crosses of Moab. It's about slicing through fresh Breckenridge powder. It's about running your toes through the sandy heaven that is Huntington Beach. It's about seeing life for what it really is. And that's why Bollé's seamless combination of authentic design, product superiority and real value is so important. Because when you perform you feel alive, and there are three simple words that describe this feeling: See. Play. Live. It's the Bollé way of life. And the time to start living is now.

TABLE OF CONTENTS

FRAME TECHNOLOGY

Bollé® has long been the brand athletes trust for sports eyewear innovation. Accept no substitutes for the fit, form and function of authentic performance technology. Accept nothing less than Bollé.

NYLONS	FRAME COLORS				
	Crimson	Crystal Blue	Crystal Blue Fade	Crystal Citrus	Crystal Clear
	Crystal Olive	Crystal Sky Blue	Crystal Smoke	Crystal Violet	Dark Tortoise
	Dirty Brown	Golden Jade	Gray Matter	Hades	Liquid Silver
	Matte Black	Metallic Black	Metallic Blue	Metallic Gray	Pearl

	TT Red	TT Silver			

METALS				
	Burnt Copper	Matte Black	Matte Bronze	Matte Gun
	Matte Silver	Satin Gold	Satin Silver	Shiny Gun

ABSORBER HINGES

Ergonomically designed hinges provide appropriate tension on the temples for a comfortable, snug fit. Available on the Canebrake.

ADJUSTABLE NOSE PADS

Allows you to tailor the position of each nose pad to fit the unique angles of your nose and keep the frame securely on your head. Available on most Bollé Metals.

DUAL COMPOSITION FRAMES

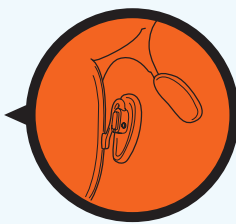

Monel, a light, corrosion-resistant metal alloy, is fused with nylon to create a durable metal frame with the comfort of a nylon frame. Available on Bollé Metals.

FLEX-GRIP®

A patented frame temple technology that incorporates a metallic insert embedded into the frame temples to carefully hug your face while securing it in place. This results in long-term, confident comfort. Available on the Laguna and Tarpon frames.

HYDRALON®

Bollé's proprietary, fortified nylon frame material is comfortably lightweight and virtually indestructible.

MICROFUSION™

A patented metal frame manufacturing process. Molten metal alloys are injected into specially designed molds for precision frame styling and design. Available on the Meanstreak, Thunderstruck and Heatseeker.

TRU™ RX PROGRAM

The Bollé **TRU** authentic prescription program offers all the style, performance and quality you expect from Bollé plano eyewear with the addition of the wearer's prescription. The **TRU** program offers a patented 8-base lens technology and perfectly matched lens tints and technologies.

SHOCK ABSORBER TIPS

These Thermogrip® temple tips have a portioned metal core that allows more comfort and flexibility, while staying securely on your face. Available on Meanstreak, Thunderstruck and Heatseeker frames.

SPRING HINGES

Engineered to provide just the right amount of tension on the temples so frames fit comfortably secure on your face. Available on most Bollé Metals.

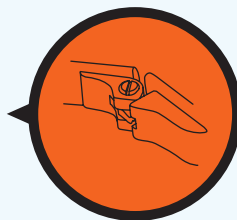

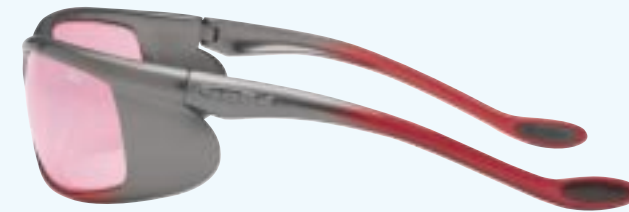

THERMOGRIP®

Super strong rubber temples and nose pads deliver firm, comfortable adhesion, especially when you sweat.

WIRE-CORE TEMPLE TIPS

Adjustable wire core temple tips increase comfort by creating a unique fit for each wearer. Available on Parole, Vigilante, Sizzle and some Metals.

* Not all features available on all frame styles.

LENS TECHNOLOGY

ANTI-REFLECTIVE (AR) COATING

Scientifically engineered lens coating, applied to the back of Bollé® lenses, eliminates annoying backside glare and ensures crystal clear optics.

ANSI STANDARDS

All Bollé lenses exceed ANSI (American National Standards Institute) requirements for UV protection, impact resistance and optical clarity.

CARBO GLAS® COATING

Industrial strength protective lens coating applied to both sides of the lens provides superior scratch-resistance.

OPTICS CONTROL SYSTEM™

Unique interchangeable lens system lets you select the right lens for any light condition. Available in most Action Sport frames.

POLARIZATION

Embedded in the lens, this optically precise filter enhances visual acuity by eliminating extreme glare and reflections.

POLYCARBONATE (PC) LENSES

Ultra-lightweight and virtually shatterproof, Bollé's premium grade plastic resin lens is 20 times more impact resistant than glass and one-third the weight.

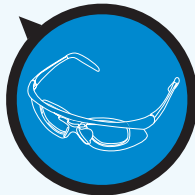

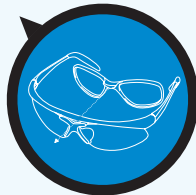

P3 TECHNOLOGY

Performance, Polycarbonate, Polarized lenses are the ultimate combination of science and performance.

SPORT OPTICAL SYSTEM (SOS)

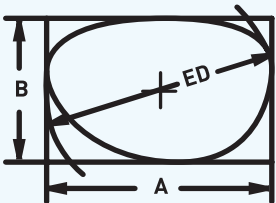

Bollé's patented Rx adapter design allows easy attachment of prescription lenses to our Vigilante and Parole interchangeable lens frames.

UVA/UVB PROTECTION

Bollé exceeds the industry standard with 100% UVA/UVB protection, up to 400 nanometers.

58/33/60/20/130

LENS COLORS

Bollé 100
Extremely dark amber lens. Perfect for climbing in high altitudes with extremely bright light conditions. ♦10%/0%

Citrus
Medium contrast orange lens. Ideal for low to medium light conditions. ♦32%/88%

Clear
Crystal clear lens. Ideal for night time activities, like night skiing. ♦87%/85%

Clear MLR
Customized clear lens with a unique multi-layer red flash mirror to enhance visual acuity during low-light and no-light conditions. Ideal for night activities and "clubbing in the city". ♦75%/59%

Cobaltz®
Medium contrast steel gray lens with platinum metallic blue mirror. Ideal for high glare environments and bright light conditions, such as marine sports. ♦13%/62%

Competivision®
THE tennis lens. High contrast teal tinted lens that mutes all colors except for optic yellow so ball stands out. Ideal for tennis and softball (optic yellow ball). ♦33%/89%

Competivision® Gun
Bollé's authentic Competivision lens, with a flash metallic silver mirror, cuts the harsh glare on the court in bright light conditions. This lens enhances visual acuity by slightly muting all colors except for optic yellow so the ball stands out. Ideal for bright days on the tennis court. ♦23%/53%

EagleVision 2®
High contrast cinnamon lens. Ideal golf lens as it highlights the breaks in the green. Best for low light conditions on the golf course. ♦28%/53%

EagleVision 2® Dark
Darker version of original high contrast cinnamon lens. Ideal for bright days on the golf course. ♦23%/89%

EagleVision 2® Gold
High contrast cinnamon lens with gold mirror coating. Ideal for most low and bright light conditions on the golf course. ♦15%/36%

H₂Optix® Polarized Vision System
Proprietary lens technology combines a polarizing lens system with hydrophobic coatings to provide the ideal sunglass lens for the harsh marine environment. Comes in Amber (ideal for freshwater lakes and rivers) Dark Gray and Gray Gradient Silver (ideal for inshore/bluewater). Ideal for all marine applications.

Inx™
Granite gray medium contrast lens with blue mirror. Ideal for high glare and outdoor sporting activities. ♦11%/25%

Lemon
High contrast yellow lens. Ideal for very low light conditions. ♦84%/84%

Midas™
Burnt gray medium contrast lens with gold mirror. Ideal for high glare light conditions and outdoor sporting activities. ♦13%/31%

Mogul™
Bollé's authentic Vermillon lens enhances contrast of white light wave lengths with a flash silver metallic mirror. Reduces intense reflections of snow and surfaces. Ideal for snow/sport activities and looking "cool". ♦22%/61%

Polarized Cactus™
Medium contrast gray/green lens with gold mirror and polarizing filter. Ideal for driving and eliminating annoying road glare. ♦20%/87%

Polarized Cobaltz®
Medium contrast steel gray lens with platinum metallic blue mirror and polarized filter. Ideal for high glare environments and bright light conditions, such as marine sports. ♦13%/62%

Polarized Inx™
Granite gray medium contrast lens with blue mirror and polarizing filter. Ideal for high glare and outdoor sporting activities. ♦14%/63%

Polarized Midas™
Burnt gray medium contrast lens with gold mirror and polarizing filter. Ideal for high glare light conditions and outdoor sporting activities. Also reduces eye fatigue by cutting down on infrared light transmission. ♦14%/52%

Polarized Sandstone®
High contrast amber lens with polarizing filter. Ideal for everyday high glare conditions. ♦19%/80%

Polarized Sandstone® Gold
High contrast amber lens with gold mirror and polarizing filter. Ideal for high glare, bright light conditions. Also reduces eye fatigue by cutting down on infrared light transmission. ♦14%/48%

Polarized Sandstone® Gun
High contrast amber lens with metallic silver mirror and polarizing filter. Ideal for everyday high glare conditions. ♦15%/72%

Polarized TNS
Neutral density gray lens with polarizing filter. Provides true color definition while fighting harsh glare. Ideal for everyday all-purpose use. ♦13%/87%

Polarized TNS Gun
Neutral density gray lens with metallic silver mirror and polarizing filter. Provides true color definition while fighting harsh glare. Ideal for everyday, all-purpose wear. ♦9%/51%

TLB (True Light Brown)
Neutral density light brown lens that provides contrast enhancement and definition. Ideal for low to medium light conditions. ♦13%/73%

TNS (True Neutral Smoke)
Neutral density gray lens provides true color definition. Ideal for all-purpose use. ♦12%/36%

TNS Gun
Neutral density gray lens with metallic silver mirror. Provides true color definition. Ideal for everyday, all-purpose wear. ♦13%/34%

Vermillon®
High contrast rose lens. Ideal for low to medium light conditions. Perfect for snow sport activities and as all-purpose eyewear. ♦40%/84%

♦ % visible light transmission / % infrared light transmission

* Not all lenses available in all frame styles.
